Summary

Full Stack and AI-focused Software Engineering intern candidate who builds LLM products that can be trusted: co-built a financial advisory system that keeps the LLM out of all calculations and refuses to invent figures, placing **1st Runner-Up among 50 teams** at Build for Billions. Also shipped a role-based grievance platform on Google Cloud Run and a real-time AI interview platform. Pre-final year CS undergraduate skilled in Python, TypeScript, React, Next.js, Node.js, FastAPI, PostgreSQL, MongoDB, Docker, REST APIs, and RAG.

Education

KLE Technological University Hubli — Hubli, KA
Bachelor's of Engineering in Computer Science *CGPA: 9.1* — *Aug 2028*

Central Public School — Kota, RJ
Sr. Secondary Education *(CBSE)– 87%* — *March 2024*

Jawahar Navodaya Vidyalaya — Kota, RJ
Secondary Education *(CBSE)– 94%* — *March 2022*

Projects & Experience

Rural Enterprise Advisor | *Python, FastAPI, WhatsApp Cloud API, Qdrant* | GitHub — Sep 2026 – Oct 2026

- **1st Runner-Up** among 50 teams at **Build for Billions** hackathon (NITK Surathkal): built a multilingual (5 languages) **WhatsApp AI advisor** with voice-note support that guides rural micro-entrepreneurs through PMEGP, MUDRA, and NSFDC/NBCFDC/NSTFDC credit schemes.
- Built a **deterministic finance engine** (margin money, EMI, DSCR) validated against **NABARD** benchmarks, with the LLM confined to language understanding and an anti-hallucination refusal for unbenchmarked trades.
- Implemented **RAG** retrieval (**Qdrant**, FastEmbed), auto-generated bank-ready **DPR PDFs**, a **Streamlit** officer console with GPS verification, and **HMAC-SHA256**-secured webhooks; **184 automated tests**.

Intrvyu AI | *Next.js, TypeScript, Express.js, PostgreSQL, Prisma, Gemini AI* | Live — Jun 2026 – Jul 2026

- Built and deployed a full-stack **AI mock interview platform** (**Next.js**, **Express.js**, **Prisma**, **Supabase PostgreSQL**) on **Vercel** and **Railway**.
- Engineered a context-aware interview engine that keeps conversation history to generate adaptive follow-ups and personalized AI feedback reports.
- Implemented secure **REST APIs** (**JWT**, **bcrypt**) with real-time communication over **WebSockets**.

Complaint Management System | *React, Node.js, Express, MongoDB, JWT* | Live — March 2026 – April 2026

- Architected and deployed a full-stack grievance portal on **Google Cloud Run** (React + Vite, Node.js/Express REST API, MongoDB) with HTTPS and CORS-secured endpoints.
- Implemented **role-based access control (RBAC)** across 5 user roles (Student, Faculty, Admin, HOD, Worker) with JWT authentication and bcrypt hashing (salt rounds = 12).
- Built an **auto-escalation engine** notifying the HOD of complaints unresolved beyond 5 working days, with in-app and email alerts on every status change.
- Delivered an admin analytics dashboard with PDF/Excel export, anonymous complaints, and photo evidence upload, validated by **32 passing test cases**.

Skills

Languages: C, C++, Python, JavaScript, TypeScript, HTML/CSS
Core Concepts: DSA, OOP, DBMS, Operating Systems, Computer Networks, REST APIs, JWT/RBAC
Frontend: React.js, Next.js
Backend / Databases: Node.js, Express.js, FastAPI, MySQL, MongoDB, PostgreSQL, Prisma, Qdrant
AI/ML: LLM Integration (Gemini, Groq), RAG, LangChain, PyTorch, Scikit-learn, XGBoost, NumPy, Pandas
Tools / Cloud: Git, GitHub, Docker, Google Cloud Run, Vercel, Railway
Languages Spoken: English (Proficient), Hindi, Kannada (Native)
